**REPORT ON REVIEW OF INTERIM
FINANCIAL INFORMATION**

To the Board of Directors of BİM Birleşik Mağazalar A.Ş.

Introduction

We have reviewed the accompanying consolidated statement of financial position of BİM Birleşik Mağazalar A.Ş. (the "Company") and its subsidiaries (together referred to as the "Group") as at 30 June 2017 and the related consolidated statements of comprehensive income, changes in equity and cash flows for the six-month period then ended, and notes, comprising a summary of significant accounting policies and other explanatory notes. The management of the Group is responsible for the preparation and fair presentation of this consolidated interim financial information in accordance with Turkish Accounting Standard 34 ("TAS 34") "Interim Financial Reporting". Our responsibility is to express a conclusion on this consolidated interim financial information based on our review.

Scope of review

We conducted our review in accordance with the Standard on Review Engagements ("SRE") 2410, "Review of interim financial information performed by the independent auditor of the entity". A review of interim financial information consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with Standards on Auditing and the objective of which is to express an opinion on the financial statements. Consequently, a review on the interim financial information does not provide assurance that the audit firm will be aware of all significant matters which would have been identified in an audit. Accordingly, we do not express an audit opinion.

Conclusion

Based on our review, nothing has come to our attention that causes us to conclude that the accompanying consolidated interim financial information does not give a true and fair view of the financial position of BİM Birleşik Mağazalar A.Ş. as of 30 June 2017, and of its financial performance and cash flows for the six-month period then ended in accordance with TAS 34.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS FOR THE INTERIM PERIOD 1 JANUARY - 30 JUNE 2017

(Amounts expressed in thousands of Turkish Lira ("TRY") unless otherwise stated and all other currencies are expressed in full amounts unless otherwise stated.)

2. Basis of preparation of financial statements

2.1 Basis of presentation

The consolidated interim financial statements are prepared in accordance with Communiqué Serial II, No:14.1, "Principles of Financial Reporting in Capital Markets" ("the Communiqué") published in the Official Gazette numbered 28676 on 13 June 2013. According to Article 5 of the Communiqué, financial statements are prepared in accordance with the Turkish Accounting Standards issued by Public Oversight Accounting and Auditing Standards Authority ("POAASA"). TAS contains Turkish Accounting Standards, Turkish Financial Reporting Standards ("TFRS") and its addendum and interpretations ("IFRIC").

The Group prepared its consolidated interim financial statements for the period ended 30 June 2017 in accordance with the TAS 34 "Interim financial reporting" in the framework of the Communiqué Serial: XII and numbered 14.1 and its related announcements. The interim consolidated financial statements and its accompanying notes are presented in compliance with the format recommended by CMB, including its mandatory information.

In compliance with the TAS 34, entities have preference in presenting their interim consolidated financial statements whether full set or condensed. In this framework, Group preferred to present its interim consolidated financial statements in full set.

The Group's financial statements and notes are presented in accordance with the formats announced by the CMB on 7 June 2013, including the compulsory disclosures.

The Group and its Turkish subsidiaries, associates and joint ventures maintain their books of accounts and prepare their statutory financial statements in accordance with the Turkish Commercial Code ("TCC"), tax legislation, the Uniform Chart of Accounts issued by the Ministry of Finance and principles issued by CMB. The foreign subsidiaries maintain their books of account in accordance with the laws and regulations in force in the countries in which they are registered. The consolidated financial statements are based on the statutory records, which are maintained under historical cost conventions, with the required adjustments and reclassifications reflected for the purpose of fair presentation in accordance with TAS.

The consolidated financial statements are presented in accordance with formats that are determined in "TMS Taksonomi Hakkında Duyur" and "Finansal Tablo Örnekleri ve Kullanım Rehberi" by Turkish Accounting Standards issued by Public Oversight Accounting and Auditing Standards Authority ("POAASA") on 2 June 2016.

Going concern assumption

The consolidated financial statements including the accounts of the Group have been prepared assuming that the Group will continue as a going concern on the basis that the entity will be able to realize its assets and discharge its liabilities in the normal course of business.

2.2 New and amended International Financial Reporting Standards

The accounting policies adopted in preparation of the consolidated financial statements as at 30 June 2017 are consistent with those of the previous financial year, except for the adoption of new and amended IFRS and IFRIC interpretations effective as of 1 January 2017. The effects of these standards and interpretations on the Group's financial position and performance have been disclosed in the related paragraphs.

The Group has adopted the new and revised standards and interpretations issued by the "POAASA" and effective from January 1, 2017, related to its business activity.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS FOR THE INTERIM PERIOD 1 JANUARY - 30 JUNE 2017

(Amounts expressed in thousands of Turkish Lira ("TRY") unless otherwise stated and all other currencies are expressed in full amounts unless otherwise stated.)

2. Basis of preparation of financial statements (Continued)

2.2 New and amended International Financial Reporting Standards (Continued)

a. *The new standards, amendments and interpretations which are effective for the financial statements as of 30 June 2017*

- Amendments to IAS 7 'Statement of cash flows' on disclosure initiative, effective from annual periods beginning on or after 1 January 2017. These amendments introduce an additional disclosure that will enable users of financial statements to evaluate changes in liabilities arising from financing activities. The amendment is part of the IASB's Disclosure Initiative, which continues to explore how financial statement disclosure can be improved.
- Amendments IAS 12 'Income Taxes', effective from annual periods beginning on or after 1 January 2017. The amendments on the recognition of deferred tax assets for unrealised losses clarify how to account for deferred tax assets related to debt instruments measured at fair value.
- Annual improvements 2014–2016;
 - IFRS 12, 'Disclosure of interests in other entities' regarding clarification of the scope of the standard. These amendments should be applied retrospectively for annual periods beginning on or after 1 January 2017.

The mentioned standards and amendments have no material impact on Group's financial statements.

b. *Standards and amendments issued but not yet effective as of 30 June 2017:*

- Amendments to IFRS 2, 'Share based payments' on clarifying how to account for certain types of share-based payment transactions, effective from annual periods beginning on or after 1 January 2018. This amendment clarifies the measurement basis for cash-settled, share-based payments and the accounting for modifications that change an award from cash-settled to equity-settled. It also introduces an exception to the principles in IFRS 2 that will require an award to be treated as if it was wholly equity-settled, where an employer is obliged to withhold an amount for the employee's tax obligation associated with a share-based payment and pay that amount to the tax authority. The standard has no impact on the financial position or performance of the Group.
- IFRS 9 'Financial instruments', effective from annual periods beginning on or after 1 January 2018. This standard replaces the guidance in IAS 39. It includes requirements on the classification and measurement of financial assets and liabilities; it also includes an expected credit losses model that replaces the current incurred loss impairment model. The standard has no impact on the financial position or performance of the Group.
- IFRS 15 'Revenue from contracts with customers', effective from annual periods beginning on or after 1 January 2018. IFRS 15, 'Revenue from contracts with customers' is a converged standard from the IASB and FASB on revenue recognition. The standard will improve the financial reporting of revenue and improve comparability of the top line in financial statements globally. The standard has no impact on the financial position or performance of the Group.

(Amounts expressed in thousands of Turkish Lira ("TRY") unless otherwise stated and all other currencies are expressed in full amounts unless otherwise stated.)

2. Basis of preparation of financial statements (Continued)

2.2 New and amended International Financial Reporting Standards (Continued)

- Amendment to IFRS 15, 'Revenue from contracts with customers', effective from annual periods beginning on or after 1 January 2018. These amendments comprise clarifications of the guidance on identifying performance obligations, accounting for licences of intellectual property and the principal versus agent assessment (gross versus net revenue presentation). New and amended illustrative examples have been added for each of those areas of guidance. The IASB has also included additional practical expedients related to transition to the new revenue standard. The standard has no impact on the financial position or performance of the Group.
- IFRS 16 'Leases', effective from annual periods beginning on or after 1 January 2019, This standard replaces the current guidance in IAS 17 and is a farreaching change in accounting by lessees in particular. Under IAS 17, lessees were required to make a distinction between a finance lease (on balance sheet) and an operating lease (off balance sheet). IFRS 16 now requires lessees to recognise a lease liability reflecting future lease payments and a 'right-of-use asset' for virtually all lease contracts. The IASB has included an optional exemption for certain short-term leases and leases of low-value assets; however, this exemption can only be applied by lessees. For lessors, the accounting stays almost the same. However, as the IASB has updated the guidance on the definition of a lease (as well as the guidance on the combination and separation of contracts), lessors will also be affected by the new standard. At the very least, the new accounting model for lessees is expected to impact negotiations between lessors and lessees. Under IFRS 16, a contract is, or contains, a lease if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration. The possible effects of the standard on the Group's financial position and performance is being evaluated.
- Amendments to IFRS 4, 'Insurance contracts' regarding the implementation of IFRS 9, 'Financial Instruments', effective from annual periods beginning on or after 1 January 2018. These amendments introduce two approaches: an overlay approach and a deferral approach. The amended standard will: give all companies that issue insurance contracts the option to recognise in other comprehensive income, rather than profit or loss, the volatility that could arise when IFRS 9 is applied before the new insurance contracts standard is issued; and give companies whose activities are predominantly connected with insurance an optional temporary exemption from applying IFRS 9 until 2021. The entities that defer the application of IFRS 9 will continue to apply the existing financial instruments standard— IAS 39.
- Amendment to IAS 40, 'Investment property' relating to transfers of investment property, effective from annual periods beginning on or after 1 January 2018. These amendments clarify that to transfer to, or from, investment properties there must be a change in use. To conclude if a property has changed use there should be an assessment of whether the property meets the definition. This change must be supported by evidence.
- Annual improvements 2014–2016;
 - IFRS 1, 'First-time adoption of IFRS', regarding the deletion of short-term exemptions for first-time adopters regarding IFRS 7, IAS 19, and IFRS 10 effective 1 January 2018.
 - IFRS 12, 'Disclosure of interests in other entities' regarding clarification of the scope of the standard. These amendments should be applied retrospectively for annual periods beginning on or after 1 January 2017.
 - IAS 28, 'Investments in associates and joint ventures' regarding measuring an associate or joint venture at fair value effective 1 January 2018.

- IFRIC 22, 'Foreign currency transactions and advance consideration', effective from annual periods beginning on or after 1 January 2018. This IFRIC addresses foreign currency transactions or parts of transactions where there is consideration that is denominated or priced in a foreign currency. The interpretation provides guidance for when a single payment/receipt is made as well as for situations where multiple payments/receipts are made. The guidance aims to reduce diversity in practice.

The Group will evaluate the effects of changes to its operations and apply from effective date.

2.3 Compliance with TAS

The Group prepared its consolidated interim financial statements for the period ended 30 June 2016 in accordance with the TAS 34 "Interim financial reporting" in the framework of the Communiqué Serial: XII and numbered 14.1 and its related announcements. The interim consolidated financial statements and its accompanying notes are presented in compliance with the format recommended by CMB, including the mandatory disclosures.

2.4 Presentation and functional currency

The individual financial statements of each group entity are presented in the currency of the primary economic environment in which the entity operates (its functional currency). For the purpose of the consolidated financial statements, the results and financial position of each entity consolidated are expressed in Turkish Lira ("TRY"), which is the functional of the Company and the presentation currency of the Group. The functional currency of the Company's subsidiary, BIM Stores SARL, is Moroccan Dirham ("MAD").

In the consolidated financial statements, MAD amounts presented in the balance sheet are translated into Turkish Lira at the TRY exchange rate for purchases of MAD at the balance sheet date, TRY 1 = MAD 2,5719 amounts in the statement of comprehensive income have been translated into TRY, at the average TRY exchange rate for purchases of MAD, is TRY 1 = MAD 2,7532. Differences that occur by the usage of closing and average exchange rates are followed under currency translation differences classified under equity.

2.4 Presentation and functional currency (Continued)

The functional currency of the Company's other subsidiary, BIM Stores LLC is Egyptian Pound ("EGP"). In the consolidated financial statements, EGP amounts presented in the balance sheet and in the statement of comprehensive income are translated into Turkish Lira at the TRY exchange rate for purchase of EGP at the balance sheet date, TRY 1 = EGP 5,1477, at the average TRY exchange rate for purchases of EGP, is TRY 1 = EGP 4,9358. Differences that occur by the usage of closing and average exchange rates are followed under currency translation differences classified under equity.

Basis of consolidation

The consolidated financial statements comprise the financial statements of the parent company BİM and its subsidiaries prepared for the period ended 30 June 2017. Subsidiaries are consolidated from the date on which control is transferred to the Group. The consolidated financial statements cover BİM and the subsidiaries with 100% control.

Subsidiaries are consolidated by using the full consolidation method; therefore, the carrying value of subsidiaries is eliminated against the related shareholders' equity.

Intercompany balances and transactions between BİM and its subsidiaries, including unrealized intercompany profits and losses are eliminated. Consolidated financial statements are prepared using uniform accounting policies for similar transactions and other events in similar circumstances.

2.5 Comparatives and restatement of prior periods' financial statements

Offsetting

Financial assets and liabilities are offset and the net amount reported in the balance sheet when there is a legally enforceable right to set off the recognized amounts and there is an intention to settle on a net basis or realize the asset and settle the liabilities simultaneously.

Accounting estimates

The preparation of financial statements in accordance with the CMB Accounting Standards require the Group management to make estimates and assumptions that affect certain reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting year. Actual results could differ from those estimates. Those estimates are reviewed periodically, and as adjustments become necessary, they are reported in income statement in the periods in which they become known.

Significant estimates used in the preparation of these financial statements and the significant judgments with the most significant effect on amounts recognized in the financial statements are mainly related with accounting of employee termination benefits, provision for inventories, revaluation of land and buildings, assessment of economic useful lives of property, plant and equipment and intangibles and provision for income taxes.

2.6. Summary of Significant Accounting Policies

Revenue recognition

Revenue is recognized on accrual basis over the amount obtained or the current value of the amount to be obtained when the delivery is realized, the income can be reliably determined and the inflow of the economic benefits related with the transaction to the Group is reasonably assured. Net sales represent the invoiced value of goods less any sales returns. Retail sales are done generally with cash or credit cards.

Sales of Goods

Revenue from sale of goods is recognized when all the following conditions are satisfied:

- The Group has transferred to the buyer all the significant risks and rewards of ownership of the goods,
- The Group retains neither continuing managerial involvement to the degree usually associated with ownership nor effective control over the goods sold,
- The amount of revenue can be measured reliably,
- It is probable that the economic benefits associated with the transaction will flow to the entity, and
- The costs incurred or to be incurred in respect of the transaction can be measured reliably.

Financial income

Profit shares income from participation banks are recognized in accrual basis.

Dividend income

Dividend income from investments. Dividend payables are recognized in the period that the profit distribution is declared.

Cash and cash equivalents

Cash and cash equivalents comprise cash on hand, cash in transit and demand deposits, and other short-term highly liquid investments which their maturities are three months or less from date of acquisition and that are readily convertible to a known amount of cash and are subject to an insignificant risk of changes in value.

Trade receivables

Trade receivables comprise trade receivables, credit card receivables and other receivables with fixed or determinable payments and are not quoted in an active market; which have an average maturity of 10 days term (31 December 2016: 10 days) as of balance sheet date are measured at original invoice amount and if they have long term maturity, the imputing interest is netted off and the provision of doubtful receivable is deducted. Trade receivables, net of unearned financial income, are measured at amortized cost, using the effective interest rate method, less the unearned financial income. Short duration receivables with no stated interest rate and credit card receivables are measured at the original invoice. Estimate is made for the doubtful provision when the collection of the trade receivable is not probable. If the amount of the impairment subsequently decreases due to an event occurring after the write-down, the release of the provision is credited to other operating income.

Inventories

Inventories are valued at the lower of cost or net realizable value. Costs comprise purchase cost and, where applicable and those overheads that have been incurred in bringing the inventories to their present location and condition. Cost is determined using the first-in, first-out (FIFO) method.

2.6. Summary of Significant Accounting Policies (Continued)

Rebates which generate from sales from ordinary operations are deducted from cost of inventories and associated with cost of sales.

Net realizable value is the estimated selling price less estimated costs necessary to realize sale.

Property, plant and equipment

All property and equipment is initially recorded at cost. Land and building are subsequently measured at revalued amounts which are the fair value at the date of the revaluation, based on valuations by external independent valuers, less subsequent depreciation for building. Group revaluates the amounts of their lands and buildings every 3 years unless there is a change in the circumstances. All other property and equipment is stated at cost less accumulated depreciation and accumulated impairment loss. When assets are sold or retired, their cost and accumulated depreciation are eliminated from the related accounts and any gain or loss resulting from their disposal is included in the statement of income. On disposal of revalued assets, amounts in revaluation reserves relating to that asset are transferred to retained earnings.

The initial cost of property and equipment comprises its purchase price, including import duties and non-refundable purchase taxes and any directly attributable costs of bringing the asset ready for use. Expenditures incurred after the fixed assets have been put into operation, such as repairs and maintenance, are normally charged to income in the year the costs are incurred. If the asset recognition criteria are met, the expenditures are capitalized as an additional cost of property and equipment.

Increases in the carrying amount arising on revaluation of property are initially credited to revaluation reserve in shareholders' equity net of the related deferred tax. Decreases that offset previous increases of the same asset are charged in other comprehensive income and debited against property and equipment revaluation reserve directly in equity; all other decreases are charged to the income statement.

Depreciation is provided on cost or revalued amount of property and equipment except for land and construction in progress on a straight-line basis. The depreciation periods for property and equipment, which approximate the estimated economic useful lives of such assets, are as follows:

	Duration (Years)
Land improvements	5
Buildings	25
Leasehold improvements	5- 10
Machinery and equipment	4- 10
Vehicles	5- 10
Furniture and fixtures	5- 10

The economic useful life, the present value and the depreciation method are regularly reviewed for possible effects of changes in estimates, the method used and the period of depreciation are closely aligned with the economic benefits to be gained from the related asset and are recognized on a prospective basis.

When a revalued asset is sold, revaluation reserve account is transferred to retained earnings.

2. Basis of preparation of financial statements (Continued)

2.6. Summary of Significant Accounting Policies (Continued)

Intangible assets

Intangible assets which mainly comprise software rights are measured initially at cost. Intangible assets are recognized if it is probable that the future economic benefits that are attributable to the asset will flow to the enterprise; and the cost of the asset can be measured reliably. After initial recognition, intangible assets are measured at cost less accumulated amortization and any accumulated impairment losses. Intangible assets excluding development costs, created within the business are not capitalized and expenditure is charged against profits in the year in which it is incurred. The useful lives of intangible assets are assessed to be either finite or indefinite.

Intangible assets with finite lives are amortized on a straight line basis over the best estimate of their useful lives. The amortization period and the amortization method for an intangible asset with a finite useful life are reviewed at least at each financial year-end.

Changes in the expected useful life or the expected pattern of consumption of future economic benefits embodied in the asset is accounted for by changing the amortization period or method, as appropriate, and treated as changes in accounting estimates. The amortization expense on intangible assets with finite lives is recognized in the statement of income in the expense category consistent with the function of the intangible asset.

The Group does not have any intangible assets with indefinite useful lives.

The carrying values of intangible assets are reviewed for impairment when events or changes in circumstances indicate that the carrying value may not be recoverable.

Impairment of non-financial assets

The carrying values of assets are reviewed for impairment when events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable. Whenever the carrying amount of an asset exceeds its recoverable amount, an impairment loss is recognized in the statement of income.

The recoverable amount of property and equipment is the greater of net selling price and value in use. Value in use is the present value of estimated future cash flows expected to arise from the continuing use of an asset and from its disposal at the end of its useful life while the net selling price is the amount obtainable from the sale of an asset after cost of sales deducted. For the purposes of assessing impairment, assets are grouped by regions which are determined operationally (cash-generating units).

Financial assets

Classification

The group classifies its financial assets in the following categories: loans and receivables, and available for sale. The classification depends on the purpose for which the financial assets were acquired. Management determines the classification of its financial assets at initial recognition.

2. Basis of preparation of financial statements (Continued)

2.6. Summary of Significant Accounting Policies (Continued)

Loans and receivables

Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market. They are included in current assets, except for maturities greater than 12 months after the end of the reporting period. These are classified as non-current assets. Trade receivables and cash and cash equivalents are classified in this category.

Available-for-sale financial assets

Available-for-sale financial assets are non-derivatives that are either designated in this category or not classified in any of the other categories. They are included in non-current assets unless the investment matures or management intends to dispose of it within 12 months of the end of the reporting period.

Recognition and measurement

Regular purchases and sales of financial assets are recognised on the trade-date the date on which the group commits to purchase or sell the asset. Investments are initially recognised at fair value plus transaction costs for all financial assets not carried at fair value through profit or loss. Financial assets carried at fair value through profit or loss are initially recognised at fair value, and transaction costs are expensed in the income statement. Financial assets are derecognised when the rights to receive cash flows from the investments have expired or have been transferred and the group has transferred substantially all risks and rewards of ownership. Available-for-sale financial assets and financial assets at fair value through profit or loss are subsequently carried at fair value. Loans and receivables are subsequently carried at amortised cost using the effective interest method.

Gains or losses arising from changes in the fair value of the 'financial assets at fair value through profit or loss' category are presented in the income statement within 'Other (losses)/gains - net' in the period in which they arise. Dividend income from financial assets at fair value through profit or loss is recognised in the income statement as part of other income when the group's right to receive payments is established.

Changes in the fair value of monetary and non-monetary financial assets that are recorded as available-for-sale financial assets are recognized in other comprehensive income.

Interest on available-for-sale securities calculated using the effective interest method is recognised in the income statement as part of other income. Dividends on available-for-sale equity instruments are recognised in the income statement as part of other income when the group's right to receive payments is established.

Offsetting financial instruments

Financial assets and liabilities are offset and the net amount reported in the balance sheet when there is a legally enforceable right to offset the recognised amounts and there is an intention to settle on a net basis or realise the asset and settle the liability simultaneously.

Recognition and derecognition of financial assets and liabilities

The Group recognizes a financial asset or financial liability in its balance sheet when only when it becomes a party to the contractual provisions of the instrument. The Group derecognizes a financial asset or a portion of it only when the control on rights under the contract is discharged. The Group derecognizes a financial liability when the obligation under the liability is discharged or cancelled or expires.

2. Basis of preparation of financial statements (Continued)

2.6. Summary of Significant Accounting Policies (Continued)

All the normal sales or purchase transactions of financial assets are recorded at the transaction date that the Group guaranteed to purchase or sell the financial asset. These transactions generally require the transfer of financial asset in the period specified by the general conditions and the procedures in the market.

All regular way financial asset purchase and sales are recognized at the date of the transaction, the date the Group committed to purchase or sell.

Impairment of financial assets

The Group assesses at each balance sheet date whether a financial asset is impaired.

Assets carried at amortized cost

If there is objective evidence that an impairment loss on assets carried at amortized cost has been incurred, the amount of the loss is measured as the difference between the asset's carrying amount and the present value of estimated future cash flows (excluding future expected credit losses that have not been incurred) discounted at the financial asset's original effective interest rate.

The carrying amount of the asset is reduced through use of an allowance account. The amount of the loss is recognized in the consolidated statement of income.

If, in a subsequent period, the amount of the impairment loss decreases and the decrease can be related objectively to an event occurring after the impairment was recognized, the previously recognized impairment loss is reversed, to the extent that the carrying value of the asset does not exceed its amortized cost at the reversal date.

Provision for impairment is provided when there is an objective evidence of uncollectibility of trade receivables. Reserve is provided for the overdue uncollectible receivables. Also portfolio reserve is provided for the not due receivables based on certain criteria. The carrying amount of the receivable is reduced through use of an allowance account.

When securities classified as available for sale are sold or impaired, the accumulated fair value adjustments recognised in equity are included in the income statement as 'Gains and losses from investment securities'.

Trade payables

Trade payables which generally have an average of 51 days term (31 December 2016: 51 days) are initially recorded at original invoice amount and carried at amortized cost less due date expense. Due date expense is accounted for under cost of sales. This amount is the fair value of consideration to be paid in the future for goods and services received, whether or not billed.

Borrowing costs

Borrowing costs that are directly attributable to the acquisition, construction or production of a qualifying asset shall be capitalized as part of the cost of that asset. Such borrowing costs are capitalized as part of the cost of the asset when it is probable that they will result in future economic benefits to the entity and the costs can be measured reliably. Other borrowing costs are recognized as an expense in the period in which they are incurred.

Foreign currency transactions

Transactions in foreign currencies during the period have been translated at the exchange rates prevailing at the dates of such transactions. Exchange rate differences arising on reporting monetary items at rates different from those at which they were initially recorded or on the settlement of monetary items or are recognized in the comprehensive income statement in the period in which they arise.

Foreign currency conversion rates used by the Group for the related period ended are as follows:

	USD/TRY (full)	EUR/TRY (full)
30 June 2017	3,5071	4,003
31 December 2016	3,5192	3,7099

Earnings per share

Earnings per share are determined by dividing net income by the weighted average number of shares that have been outstanding during the period concerned. The weighted average number of shares outstanding during the year has been adjusted in respect of free shares issued without corresponding increase in resources

In Turkey, companies can raise their share capital by distributing "Bonus Shares" to shareholders from retained earnings. In computing earnings per share, such "Bonus Share" distributions are assessed as issued shares. Accordingly, the retrospective effect for those share distributions is taken into consideration in determining the weighted-average number of shares outstanding used in this computation.

Events after balance sheet date

Post year/period-end events that provide additional information about the Group's position at the balance sheet date (adjusting events), are reflected in the financial statements. Post year/period-end events that are not adjusting events are disclosed in the notes when material.

Provisions, contingent assets and contingent liabilities

i) Provisions

Provisions are recognized when the Group has a present obligation (legal or constructive) as a result of a past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. If the effect of the time value of money is material, provisions are determined by discounting the expected future cash flows at a pre-tax rate that reflects current market assessments of the time value of money and, where appropriate, the risks specific to the liability. Where discounting is used, the increase in the provision due to the passage of time is recognized as interest expense.

ii) Contingent assets and liabilities

A contingent asset is not recognised in the financial statements but disclosed when an inflow of economic benefits is probable. Contingent liabilities are not recognised in the financial statements but they are disclosed only, unless the possibility of an outflow of resources embodying economic benefits is probable.

Leases

Operating leases

Leases where the lessor retains substantially all the risks and benefits of ownership of the asset are classified as operating leases. Operating lease payments are recognized as an expense in the statement of income on a straight-line basis over the lease term.

Related parties

- a) A person or a close member of that person's family is related to a reporting entity if that person:
- i) has control or joint control over the reporting entity,
 - ii) has significant influence over the reporting entity, or,
 - iii) is a member of the key management personnel of the reporting entity or of a parent of the reporting entity.
- b) An entity is related to a reporting entity if any of the following conditions applies:
- i) The entity and the reporting entity are members of the same group,
 - ii) One entity is an associate or joint venture of the other entity (or an associate or joint venture of a member of a group of which the other entity is a member),
 - iii) Both entities are joint ventures of the same third party,
 - iv) One entity is a joint venture of a third entity and the other entity is an associate of the third entity,
 - v) The entity is a post-employment benefit plan for the benefit of employees of either the reporting entity or an entity related to the reporting entity. If the reporting entity is itself such a plan, the sponsoring employers are also related to the reporting entity,
 - vi) The entity is controlled or jointly controlled by a person identified in (a),
 - vii) A person identified in (a)(i) has significant influence over the entity or is a member of the key management personnel of the entity (or of a parent of the entity).

Income taxes

Current Income Taxes and Deferred Tax

The tax expense for the period comprises current and deferred tax. Tax is recognized in the statement of income, except to the extent that it relates to items recognized directly in equity or other comprehensive income. In such case, the tax is recognized in shareholders' equity or other comprehensive income.

The current period tax on income is calculated for the Group's subsidiaries, associates and joint ventures considering the tax laws that are applicable in the countries where they operate.

Deferred tax liability or asset is recognized on differences between the carrying amounts of assets and liabilities in the financial statements and the corresponding tax bases which are used in the computation of taxable profit. However, deferred income tax is not accounted for if it arises from initial recognition of an asset or liability in a transaction other than a business combination that at the time of the transaction affects neither accounting nor taxable profit or loss. Deferred income tax is determined using tax rates and tax regulations that have been enacted or substantially enacted by the balance sheet date and are expected to apply when the related deferred income tax asset is realized or the deferred income tax liability is settled.

2.6. Summary of Significant Accounting Policies (Continued)

The main temporary differences are from the time differences between carrying amount of tangible assets and their tax base amounts, the available expense accruals that are subject to tax and tax allowances that are not utilized.

Deferred tax liabilities are recognized for all taxable temporary differences, where deferred tax assets resulting from deductible temporary differences are recognized to the extent that it is probable that future taxable profit will be available against which the deductible temporary difference can be utilized.

When the deferred tax assets and deferred tax liabilities relate to income taxes levied by the same taxation authority and there is a legally enforceable right to set off current tax assets against current tax liabilities, deferred tax assets and deferred tax liabilities are offset accordingly.

Statement of Cash Flows

The Group prepares statements of cash flows as an integral part of its of financial statements to enable financial statement analysis about the change in its net assets, financial structure and the ability to direct cash flow amounts and timing according to evolving conditions. Cash flows include those from operating activities, working capital, investing activities and financing activities.

Cash flows from operating activities represent the cash flows generated from the Group's activities.

Cash flows related to investing activities represent the cash flows that are used in or provided from the investing activities of the Group (fixed investments and financial investments).

Cash flows arising from financing activities represent the cash proceeds from the financing activities of the Group and the repayments of these funds.

Employee Benefits

a) Defined benefit plans:

In accordance with existing social legislation in Turkey, the Company is required to make lump-sum termination indemnity payments to each employee who has completed over one year of service with the Company and whose employment is terminated due to retirement or for reasons other than resignation or misconduct. As detailed in Note 14, the employee benefit liability is provided for in accordance with TAS 19 "Employee Benefits" and is based on an independent actuarial study.

Actuarial gains and losses that calculated by professional actuaries, are recognized in the actuarial gain/loss fund regarding employee termination benefits in the equity. Recognized gains and losses shall not be transferred to comprehensive statement of income in the following periods. Reserve for employee termination benefits is recognized to financial statements that calculated with the discount rate estimated by professional actuarial.

b) Unused vacation

Unused vacation rights accrued in the consolidated financial statements represents estimated total provision for potential liabilities related to employees' unused vacation days as of the balance sheet date.

3. Segment reporting

Operating segments are reported in a manner consistent with the internal reporting provided to the chief operating decision makers of the Group. The chief operating decision makers, who are responsible for allocation resources and assessing performance of the operating segments, have been identified as the senior management that makes strategic decisions.

The senior management of the Group makes strategic decisions as a whole over the operations of the Group as the Group operates in a single industry and operations outside Turkey do not present an important portion in overall operations. Based on those reasons, there is a single reportable segment in accordance with the provisions in TFRS 8 and segment reporting is not applicable.

10. Property, plant and equipment (Continued)

Depreciation expense amounting to TRY114.096 (1 January - 30 June 2016: TRY92.745) were accounted for in marketing expenses and TRY8.070 (1 January - 30 June 2016: TRY6.852) in general and administrative expenses for the period 1 January - 30 June 2017. The land and buildings were revalued and reflected to financial statements with their fair value. The latest valuation is performed on 31 December 2015 and it is assumed that no material changes have been identified in subsequent period. The book values of such assets were adjusted to the revalued amounts and the resulting surplus net of deferred income tax was credited to revaluation surplus in the equity. The revaluation surplus is not available for distribution to shareholders.

Had the revalued assets been carried at cost less accumulated depreciation, the carrying amounts of land and buildings would have been as follows as of 30 June 2017 and 31 December 2016, respectively:

Fair values of land and buildings

An independent valuation of the group's land and buildings was performed by valuers to determine the fair value of the land and buildings as at 30 June 2017 and 31 December 2016. The revaluation surplus, as of 31 December 2015 net of applicable deferred income taxes was credited to other comprehensive income and is shown in 'property and equipment revaluation reserve' in shareholders equity. The fair value of non-financial assets by valuation method is calculated by inputs observable for the asset or liability, either directly (that is, as prices) or indirectly (that is, derived from prices) (Level 2).

Valuation techniques used to derive level 2 fair values

Sale or purchase costs or tax deductions are not taken into account in assumption of Level 2 fair value of land and buildings. The most common valuation techniques used are market comparable method, cost and income approach including discounted cash flow analysis.

Market comparable method

A property's fair value is estimated based on comparison of sales and market data of similar or comparable properties. The revaluated property is compared with the sales of similar properties in the market or asked price and bid price.

Discounted cash flow method

Value assumption is conducted through discount method by taking into account the data of expenditure and revenue belong to the revaluated property. The reduction is associated with value and revenue converting the amount of revenue to value assumption. Either the ratio of proceeds or/and discount should be taken into consideration. Within this approach, Direct Capitalization of Income and Cash Flow Analysis are applied predominantly. During the application of Direct Capitalization of Income, rental data belong to the similar real estate in the same region where the property based in has been used. Unless enough data for probable ratio of capitalization is attained, the method aforementioned has not been applied on.

10. Property, plant and equipment (Continued)

Cost approach

Instead of purchase of property, the probability of construction of the same of the property or another property provides the same benefit is taken into account. In practice the estimated value includes the amortization of old and less functional properties in case new one's cost exceeds the potential price to be paid for revaluation of the property.

It determines how transaction will be traded in the market and the approach and methods will be used in estimation of fair value of land and building. Sales prices of comparable land and buildings in close proximity are adjusted for differences in key attributes such as property size. The most significant input into the valuation approach is price per square meter.

In the market comparable method, one of the methods applied during the valuation, room for negotiation has been considered and reconciliation has done for the positive and negative features of property with respect to the precedents.

Valuation processes of the group

The Group's finance department reviews the fair value of land and buildings for reporting purposes. On an annual basis, the Group engages external, independent and CMB licensed valuation firm.

Revaluations are performed with sufficient regularity to ensure that the fair value of a revalued asset does not differ materially from its carrying amount as of balance sheet date. Group revaluates the amount of their lands and buildings every 3 years unless there is a change in the circumstances. The valuation of land and buildings was built in 2015. The fair value of real estate is determined by the harmonization of "Analysis of Cash Flows", "Direct Capitalization" and "Market Comparable Method".

As of 30 June 2017 and 31 December 2016, the gross carrying amount of property and equipment and intangibles, which are fully depreciated, but still in use, is as follows:

	30 June 2017	31 December 2016

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS FOR THE INTERIM PERIOD 1 JANUARY - 30 JUNE 2017

(Amounts expressed in thousands of Turkish Lira ("TRY") unless otherwise stated and all other currencies are expressed in full amounts unless otherwise stated.)

13. Prepaid expenses (Continued)

b) Long term prepaid expenses

	30 June 2017	31 December 2016
Advances given for property, plant and equipment	35.893	31.266
Other	2.520	4.846
	38.413	36.112

14. Employee termination benefits

	30 June 2017	31 December 2016
Provision for employee termination benefits	78.423	77.671
	78.423	77.671

The amount payable consists of one month's salary limited to a maximum of TRY 4.426,16 for each period of service as of 30 June 2017 (31 December 2016: TRY4.297,21). The retirement pay provision ceiling is revised annually, and TRY 4.426,16 which is effective from 1 January 2017, is taken into consideration in the calculation of provision for employment termination benefits (effective from 1 January 2016: TRY4.092,53). Liability of employment termination benefits is not subject to any funding as there is not any obligation. Provision is calculated by estimating the present value of the future probable obligation of the Group arising from the retirement of the employees. TAS 19 "Employee Benefits" requires actuarial valuation methods to be developed to estimate the Group's obligation under the defined benefit plans. The following actuarial assumptions are used in the calculation of the total liability. Actuarial loss/ (gain) is accounted in the statement of comprehensive income under "Actuarial gain/loss from defined benefit plans".

The principal assumption is that the maximum liability for each year of service will increase in line with inflation. Thus, the discount rate applied represents the expected real rate after adjusting for the anticipated effects of future inflation. Consequently, in the accompanying consolidated financial statements as of 30 June 2017 and 31 December 2016 the provision is calculated by estimating the present value of the future probable obligation of the Group arising from the retirement of the employees. Provisions at the balance sheet date were calculated by using real discount rate of 4,25% by assuming an annual inflation rate of 6,0% and a discount rate of 10,50% (31 December 2016: 10,50%). The anticipated rate of forfeitures that occurred on voluntary turnovers is considered.

b) Restricted reserves and retained earnings

The legal reserves consist of first and second legal reserves, per the Turkish Commercial Code (TCC). The TCC stipulates that the first legal reserve is appropriated out of net statutory profits at the rate of 5% per annum, until the total reserve reaches 20% of the Company's historical paid-in share capital. The second legal reserve is appropriated at the rate of 10% per annum of all cash distributions in excess of 5% of the historical paid-in share capital. Under TCC, the legal reserves are not available for distribution unless they exceed 50% of the historical paid-in share capital but may be used to offset losses in the event that historical general reserve is exhausted.

The statutory accumulated profits and statutory current year profit are available for distribution, subject to the reserve requirements referred to above and Turkish Capital Market Board (CMB) requirements related to profit distribution.

Listed companies distribute dividend in accordance with the Communiqué No. II-19.1 issued by the CMB which is effective from 1 February 2014.

Companies distribute dividends in accordance with their dividend payment policies settled and dividend payment decision taken in general assembly and also in conformity with relevant legislations. The communiqué does not constitute a minimum dividend rate. Companies distribute dividend in accordance with the method defined in their dividend policy or articles of incorporation. In addition, dividend can be distributed by fixed or variable installments and advance dividend can be paid in accordance with profit on interim financial statements of the Company.

Liquidity risk

Prudent liquidity risk management includes maintaining sufficient cash and marketable securities, the availability of funding from an adequate amount of committed credit facilities and the ability to close out market positions.

The ability to fund existing and prospective debt requirements is managed by maintaining the availability of adequate committed funding lines from high quality lenders.

Capital risk management

The Group's objectives when managing capital are to safeguard the Group's ability to continue as a going concern in order to provide returns for shareholders and benefits for other stakeholders and to maintain an optimal capital structure to reduce the cost of capital.

The Group monitors capital on the basis of the gearing ratio. Net debt is calculated as total liabilities less cash and cash equivalents.

The gearing ratios at 30 June 2017 and 31 December 2016 are as follows:

	30 June 2017	31 December 2016
Total liabilities	3.720.966	3.087.960
Less: Cash and cash equivalents	(602.324)	(578.435)

28. Financial instruments (fair value disclosures and disclosures in the frame of hedge accounting)

Fair value estimation

The table below analyses financial instruments carried at fair value, by valuation method. The different levels have been defined as follows:

- Quoted prices (unadjusted) in active markets for identical assets or liabilities (Level 1).
- Inputs other than quoted prices included within level 1 that are observable for the asset or liability, either directly (that is, as prices) or indirectly (that is, derived from prices) (Level 2).
- Inputs for the asset or liability that are not based on observable market data (that is, unobservable inputs) (Level 3).

The following table presents the group's financial assets and liabilities that are measured at fair value at 30 June 2017 and 31 December 2016. See note 10 for disclosures of the land and buildings that are measured at fair value.

30 June 2017	Level 1	Level 2	Level 3	Total
Available for sale financial assets				
Retail industry	-	180.839	-	180.839
Total assets	-	180.839	-	180.839
31 December 2016	Level 1	Level 2	Level 3	Total
Available for sale financial assets				
Retail industry	-	180.839	-	180.839
Total assets	-	180.839	-	180.839

There were no transfers between levels during year.

(a) *Financial instruments in level 2*

The fair value of financial instruments that are not traded in an active market (for example, over-the-counter derivatives) is determined by using valuation techniques. These valuation techniques maximize the use of observable market data where it is available and rely as little as possible on entity specific estimates. If all significant inputs required to fair value an instrument are observable, the instrument is included in level 2.

If one or more of the significant inputs is not based on observable market data, the instrument is included in level 3.

INTERIM FINANCIAL STATEMENTS ORIGINALLY ISSUED IN TURKISH**

BİM BİRLEŞİK MAĞAZALAR A.Ş.

**NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
FOR THE INTERIM PERIOD 1 JANUARY - 30 JUNE 2017**

(Amounts expressed in thousands of Turkish Lira ("TRY") unless otherwise stated and all other currencies are expressed in full amounts unless otherwise stated.)

**28. Financial instruments (fair value disclosures and disclosures in the frame of hedge accounting)
(Continued)**

Specific valuation techniques used to value financial instruments include:

- Quoted market prices or dealer quotes for similar instruments,
- The fair value of interest rate swaps is calculated as the present value of the estimated future cash flows based on observable yield curves,
- The fair value of forward foreign exchange contracts is determined using forward exchange rates at the balance sheet date, with the resulting value discounted back to present value,
- Other techniques, such as discounted cash flow analysis, are used to determine fair value for the remaining financial instruments.

As of 30 June 2017 and 31 December 2016, except for the available for sale financial assets disclosed in Note 5, the fair values of certain financial assets carried at cost including cash and cash equivalents profit share accruals and other short term financial assets are considered to approximate their respective carrying values due to their short-term nature. The carrying value of trade receivables along with the related allowance for unearned income and uncollectibility are estimated to be their fair values.

- Financial liabilities

Financial liabilities of which fair values approximate their carrying values:

Fair values of trade payables and other monetary liabilities are considered to approximate their respective carrying values due to their short-term nature. The bank borrowings are stated at their amortized costs and transaction costs are included in the initial measurement of loans and bank borrowings. The fair value of bank borrowings with variable rates are considered to approximate their respective carrying values since the profit share rate applied to bank loans and borrowings are updated periodically by the lender to reflect active market price quotations. The carrying value of trade payables along with the related allowance for unrealized cost is estimated to be their fair values.

29. Events after balance sheet date

On the basis of the decision taken by the Board of Directors on 22 June 2017, it is decided to establish a %100 owned subsidiary with 5.000.000 TL (full) capital in order to provide the supply and packaging of various food items, especially rice and pulse products sold in the Company retail stores; and to authorize the Executive Committee to follow the all establishment procedures. GDP Gıda Paketleme ve Sanayi ve Ticaret A.Ş. became a legal entity and started its activities with the completion of the registration on 13 July 2017.
