

BİM BİRLEŞİK MAĞAZALAR A.Ş.
ENVIRONMENTAL POLICY

BİM Birleşik Mağazalar A.Ş. aims to reduce its environmental impact in its operations, being aware of its responsibility towards the environment. The company aspires to continuously develop and grow with environmental awareness by complying with national and international standards and legal regulations.

The following principles form the basis of BİM's Environmental Policy;

- Complies with the national and international legal regulations in the regions it operates and develops new approaches beyond its obligations.
- Works to reduce the environmental impacts arising from its operations and constantly reviews, monitors and audits its policies in order to improve its environmental performance.
- Performs target-oriented environmental performance management; reports and transparently shares the progress in line with these targets.
- Makes use of new technologies in the management of environmental impacts and closely follows global developments and research.
- Offers products and services that minimize environmental impacts as much as possible.
- Develops applications that will contribute to the fight against the climate crisis. In this direction, it encourages the development of projects to reduce greenhouse gas emissions in business processes to support the transition to a low-carbon economy.
- Performs effective water management to minimize water consumption and wastewater.
- Carries out studies for minimizing and re-evaluating wastes, especially plastic, and in cases where it is not possible to recycle, it ensures that they are disposed of in accordance with the legislation in line with the principles of the circular economy.
- Oversees the protection of biodiversity and assumes its responsibilities in its fields of activity.
- Communicates with all its stakeholders, especially its employees and suppliers; encourages them for responsible environmental management, and takes the opinions of the stakeholders on this issue.
- Takes into account the environmental approaches of its suppliers in supplier acceptance processes and audits. It supports the implementation of the Environmental Policy in business processes by its suppliers.

The Company's Board of Directors has overall responsibility for the operation and implementation of this policy. The Company reviews the adequacy, effectiveness and implementation of this policy at appropriate intervals. Detected improvement actions are taken as soon as possible.

The company publicly shares its environmental performance transparently with the aim of improving it every year. While determining the material issues within the scope of sustainability reporting, opinions are collected from all stakeholders through stakeholder analysis studies.
